

TruColor Technology

StyleLite®

StyleLite was introduced to the decorative panel market in 2008. At that time, the StyleLite sheet manufacturing process utilized world best practice two layer co-extrusion technology. As improved resin and processing technology became available, the StyleLite sheet materials and manufacturing process have been upgraded many times.

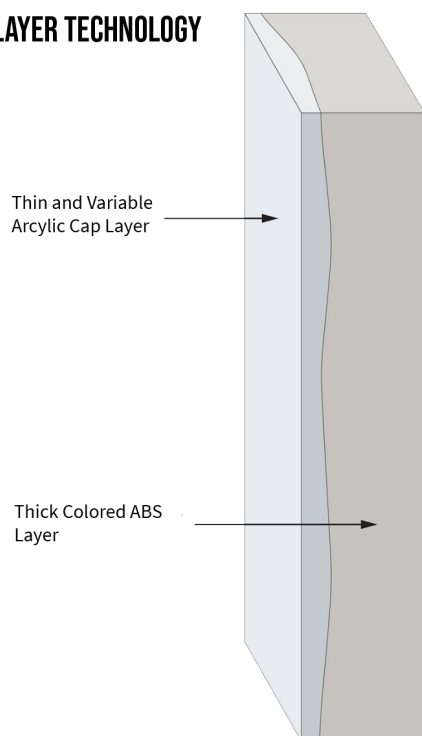

EGR Décor has now introduced the latest progression of TruColor Technology across the StyleLite sheet range. TruColor features a unique combination of multiple UV barrier layers combined with the most advanced resin formulations available.

TruColor StyleLite delivers a whole new level of class leading decorative acrylic sheet and panel performance.

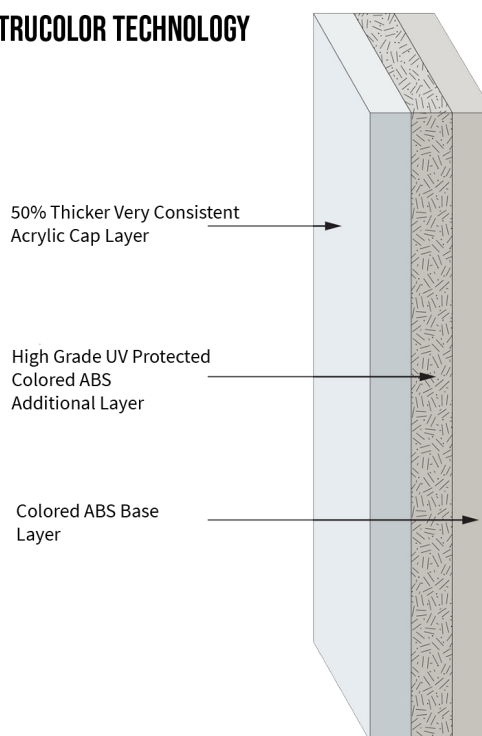

Key determining factors for high UV protection are;

1. Thickness of the acrylic layer
2. The types of UV absorbers in the acrylic layer
3. UV color additive protection measures

TWO LAYER TECHNOLOGY

TRUCOLOR TECHNOLOGY

History of StyleLite and TruColor Technology

2020

TruColor Technology launched across the StyleLite range. TruColor extrusion technology increases the UV color change resistance by 10 to 15 times higher compared to previous technologies.

2019

In 2019, TruColor Technology was introduced into StyleLite white colored sheet. This advanced process uses three layers of material, allowing for greater consistency of the layers across the entire sheet.

2017

A significant improvement to the UV stabilisation process of the StyleLite base layer was introduced. The new formulation significantly increased protection to the white colors.

2010

From 2008, a transition was made to the global thickness of 1mm for all StyleLite sheets. The color range was expanded to secure increased market share throughout USA, Asia and Europe.

2008

New to the Australian market, the StyleLite sheet program was available in six colours with a 1.5mm thickness. Sheets were sold to laminators in Australia and throughout various parts of the world.

About EGR Decor

Drawing on a rich and diverse 47- year heritage in the design, manufacture, and marketing of leading-edge products for Australian and international markets, EGR Decor offers designers, fabricators and homeowners a stunning collection of wall and cabinet materials.
