

VuPlex® - Statement of Certification

VuPlex® is a polish specifically designed to clean, protect and maintain modern high gloss and matte finishes. VuPlex® is compatible with EGR Decor's StyleLite surface and delivers the following benefits:

- StyleLite is protected by a removable peel coat which is also designed to make the surface more pliable for ease of bending and use with woodworking tools. Consequently, upon removal of the peel coat, the panel surface can be more susceptible to damage. The application of VuPlex immediately after removal of the peel coat markedly increases the durability of StyleLite by hardening the surface facilitating vastly improved scratch, mar and abrasion resistance.
- Acts as an anti static thereby minimizing dust buildup on the panel surface.
- VuPlex® can fill micro scratches in the panel surface promoting improved luster on older StyleLite panels.
- Water and contaminants are repelled from the StyleLite panel surface.
